Statement

Dear Shareholders
Ladies and Gentlemen

For the first half of 2011, VP Bank Group recorded total net income of CHF 19.4 million, a 20.2 percent increase versus the comparable prior-year period. Ongoing uncertainties in the eurozone and a deteriorating global economic outlook set the tone during the first half of 2011. Interest rates remained at historically low levels, and the Swiss franc gained sharply in value against the other major currencies. All of this led to restraint in clients' investment activities.

A positive trend was observed in terms of net new money in-flow (CHF 0.3 billion). On June 30, 2011, client assets under management at VP Bank Group amounted to CHF 27.2 billion, and total client assets (including those held in custody) stood at CHF 39.2 billion versus the CHF 40.8 billion recorded as at December 31, 2011.

The income statement reveals an increased contribution from the net interest income in the amount of CHF 37.4 million (4.9 percent). Income from the commission business and services declined by 5.6 percent to CHF 65.8 million, whereby foreign-exchange losses on the sizable client assets held in other currencies also had a negative impact. Net income from trading activities was lower at CHF 16.6 million.

Operating expenses declined versus the prior-year period by 3.6 percent to CHF 87.0 million and were therefore within the range of the previously communicated targets. Total assets remained essentially at the 2010 year-end level, as did shareholders' equity. With a tier 1 ratio of 18.1 percent, VP Bank Group remains solidly capitalized.

In November of last year, VP Bank Group communicated its medium-term goals and remains committed to them. The tier 1 ratio of 16 percent has been and will be clearly exceeded. However, the cost/income ratio target of 65 percent was not achieved in the first half of 2011 (69.2 percent versus the prior-year reading of 68.3 percent). In terms of the average 5 percent annual increase in net new money, the positive trend witnessed in the past two half-years is of particular note. In summary, our stronger year-on-year first-half results can be attributed to the Group's intensified market activities. Our disciplined cost management has also contributed significantly to the stability of those results. Revenues were negatively impacted by the low level of interest rates and developments on the foreign-currency front. However, the increasing inflow of net new money must be viewed as a sustained positive factor.

During the course of the first half of 2011, VP Bank Group continued to drive ahead with its strategic initiatives: various company locations were reinforced with personnel, even as the Group-wide total headcount was reduced. Our Luxem-

bourg banking entity will switch over to the Avaloq banking software on January 1, 2012, at which point all banks within VP Bank Group will be operating with a common IT platform. Our collaboration with Liechtensteinische Landesbank AG in the areas of IT and logistics is progressing well. The initial three projects of this joint undertaking have been realized.

In response to the regulatory circumstances in the cross-border asset-management business, important new courses have been charted recently in Switzerland and Liechtenstein. Even though the adopted or proposed regulations have yet to acquire legal force, they point the way and underscore the actions that need to be taken. VP Bank has embraced these changes and is resolutely focusing its business model, organization and employee training efforts in such a way that the greatest advantage is gained from them.

The solid half-year results achieved in 2011 despite the highly challenging overall conditions, combined with the warm reception our services have met with in VP Bank's various markets, demonstrate that our range of services and our international presence clearly correspond to client needs. On behalf of our clientele, we want to broaden our international competence in the asset-management business, be it related to the servicing of financial intermediaries, the commercial banking field, or our strong private banking position in Liechtenstein and the neighboring region in a targeted manner.

We thank you sincerely for the trust you place in VP Bank Group and look forward to counting you among our valued shareholders and clients. Our thanks as well go to our employees for their dedicated efforts in all functions and at all VP Bank locations.

Hans Brunhart

Consolidated Semi-Annual Report of VP Bank Group

Group results

VP Bank Group generated net income in accordance with International Financial Reporting Standards (IFRS) of CHF 19.4 million for the first half of 2011. In comparison with the same period of 2010, in which the Group achieved net income of CHF 16.1 million, this represents an increase of 20.2 percent. The first half of 2011 was marked by ongoing uncertainties within the eurozone and deteriorating global economic prospects. The Swiss franc continued its appreciation against most currencies, and interest rates remained at a historic low. This impacted the business of VP Bank, primarily affecting client activities, which receded significantly. Market activities proceeded positively. Net new money inflows of some CHF 0.3 billion were acquired during the first half year.

Medium-term goals

In the medium term, VP Bank Group has set itself the following measurement targets:

- net new money inflows of an average of 5 percent per annum
- cost/income ratio of 65 percent
- tier 1 ratio of 16 percent

In both of the last two half-years, VP Bank Group was able to record positive net new money inflows. In the first half of 2011, the net new money inflow was CHF 0.3 billion, or 1.0 percent. In 2010, a total of CHF 0.1 billion, or 0.3 percent, was achieved. In the first half of 2011, the cost/income ratio improved to 69.2 percent (prior-year period: 68.3 percent). The decline in revenues of CHF 6.4 million could not be completely made good by the reduction in costs of CHF 3.2 million. VP Bank Group is well capitalized with a tier 1 ratio of 18.1 percent. The medium-term goal of 16 percent which is far higher than the level required by law, was exceeded as at the end of June 2011. The future regulatory framework of Basel III will impose stricter capital-adequacy and liquidity requirements on credit institutions. Possessing a robust core capital (tier 1), VP Bank Group, even after the introduction of Basel III, will possess a tier 1 ratio expressing a high measure of stability and security.

Client assets

As of June 30, 2011, client assets under management of VP Bank Group totaled CHF 27.2 billion. In comparison with the amount as of December 31, 2010, this represents a decline of 3.5 percent. Thanks to intensive market activities, VP Bank Group succeeded in acquiring new client money inflows of CHF 0.3 billion in the first half of 2011 (prior-year period: minus CHF 0.3 billion). The performance-related decline in assets amounted to CHF 1.3 billion, resulting primarily from exchange-rate movements. Custody assets declined by 5.1 percent to CHF 12.0 billion (December 31, 2010: CHF 12.6 billion) as a result of performance-related changes. Client assets including custody assets thus totaled CHF 39.2 billion as at 30 June 2011 (December 31, 2010: CHF 40.8 billion).

Income statement

Total net operating income

Total net operating income declined by 4.9 percent over the prior-year period: from CHF 132.1 million to CHF 125.7 million. Net interest income rose by 4.9 percent to CHF 37.4 million. As a consequence of the volatile and uncertain market environment, income from commission business and services suffered a reduction of 5.6 percent to CHF 65.8 million. The low level of client activities and the strength of the Swiss franc had a negative impact.

Brokerage income, securities account commissions as well as other commissions declined by 14.0 percent, 8.5 percent and 13.4 percent, respectively. On the other hand, commissions from investment funds progressed positively increasing by 5.1 percent and income from the asset-management and investment business remained constant.

Net income from trading activities declined by 36.0 percent to CHF 16.6 million. Trading on behalf of clients reduced slightly by 4.3 percent to CHF 11.7 million. Proprietary trading closed positively at CHF 4.9 million as a result of foreign-currency hedges. Gains and losses from financial investments are recorded in a separate caption as a result of the early adoption of IFRS 9. During the first half of 2011, gains on financial investments of CHF 5.8 million were achieved. In the comparable prior-year period, these totaled CHF 0.8 million. Other income

remained constant compared to the level of the first six months of 2010 and amounted to CHF 0.1 million.

Operating expenses

Operating expenses declined period-on-period by 3.6 percent to CHF 87.0 million. As of the end of June 2011, VP Bank Group had 718 employees, expressed as full-time equivalents, which equates to a slight reduction of 1.3 percent in the first half of 2011. The average headcount was 723 employees (first half of 2010: 717 employees). Personnel expenses increased by 4.6 percent to CHF 61.4 million. General and administrative expenses fell by 18.9 percent to CHF 25.6 million. Cost savings were achieved in all business areas. The reduction in capital-tax expense is to be ascribed to the new Tax Law in Liechtenstein.

Depreciation and amortization, valuation allowances, provisions and losses

Depreciation and amortization fell by 15.4 percent period-on-period and amounted to CHF 16.9 million. Charges relating to valuation allowances, provisions and losses could be significantly reduced as a result of the release of valuation allowances that were no longer required. In total, valuation adjustments, provisions and losses amounted to CHF 0.4 million (prior-year period: CHF 4.0 million).

Net income attributable to the shareholders of Verwaltungs- und Privat-Bank Aktiengesellschaft

After deducting minority interests a net income of CHF 18.1 million attributable to the shareholders of Verwaltungs- und Privat-Bank Aktiengesellschaft remained (prior-year period: CHF 14.5 million). Net income per bearer share improved by 24.5 percent from CHF 2.52 to CHF 3.14.

Balance sheet

Total assets of CHF 10.7 billion increased only marginally over the level at December 31, 2010. On the liabilities' side, deposits from clients and medium-term bonds declined from CHF 8.9 billion to CHF 8.6 billion. On the assets' side, particularly the levels of money-market paper and bank deposits declined. In total, these positions fell by 6.9 percent to CHF 6.5 billion. Loans to clients increased by 8.9 percent to CHF 3.6 billion. The shareholders' equity of VP Bank Group as at the end of June 2011 totaled CHF 0.9 billion. The shareholders' equity attributable to the shareholders of Verwaltungs- und Privat-Bank Aktiengesellschaft also stood at CHF 0.9 billion. As of June 30, 2011, the tier 1 ratio was 18.1 percent (December 31, 2010: 19.0 percent).

Outlook

At the present time, there is little that would indicate that the economic uncertainty will abate. VP Bank anticipates that client activities will continue on a downward trend through the second half of 2011. It is expected that interest rates will remain at a low level and the strength of the Swiss franc will continue. These conditions will impact results.

Principles Underlying Financial Statement Reporting

The unaudited semi-annual Group interim report was drawn up in conformity with International Financial Reporting Standards (IAS 34). With the exception of the following modifications and revisions, the semi-annual financial statements were prepared on the basis of the presentation and valuation policies as applied as of December 31, 2010.

The following new and revised standards and interpretations have been in force since January 1, 2011:

- IAS 24 (amended, effective January 1, 2011) – Related Party Transactions
- IAS 32 (amended, effective February 1, 2010) – Classification of Rights Issues
- IAS improvements 2010 (various amendments, effective January 1, 2011)
- IFRIC 14 (effective January 1, 2011) – Prepayments of a Minimum Funding Requirement
- IFRIC 19 (effective July 1, 2010) – Debt for Equity Swaps.

The application of these standards had no material impact on interim reporting.

During the 2011 accounting period, VP Bank Group had applied the following new Standard:

- IFRS 9, Phase I (effective January 1, 2015) – Financial Instruments – Classification and Measurement

As a result of the early adoption of this Standard, unrealised gains and losses on financial instruments were reclassified to income reserves. The related financial instruments were also reclassified – from the caption “available-for-sale financial instruments” to the captions “financial instruments at fair value” and “financial instruments measured at amortised cost”. The reclassification is necessary depending on the nature of the financial instruments. In accordance with IFRS 9 there is no restatement required.

Financial instruments measured at amortised cost

Investments, whose objective it is to hold the financial asset in order to realise the related contractual cash flows and whose contractually agreed cash flows represent only interest and the repayment of portions of the nominal amount, are to be measured at amortised cost using the effective interest method. A financial investment measured at amortised cost is to be classified as value-impaired whenever it is probable that the contractually owed amount will not be collected in full. The reasons for impairment in value may be specific to the counterparty or country. Whenever impairment occurs, the carrying value of the asset is reduced to its realisable value

and the difference is recognised in the income statement under income from financial instruments.

Interest is recognised on an accruals basis using the effective interest method and is reported under net interest income in the caption “interest income from financial instruments measured at amortised cost”.

Financial instruments valued at fair value (FVTPL)

Financial instruments not meeting the afore-mentioned conditions are recorded at fair value. The resulting gains or losses are reported under income from financial instruments in the caption “income from financial instruments at fair value”.

Provided the criteria set out in IFRS 9 are met, a financial instrument upon initial recognition may also be designated and recorded in this category.

Interest and dividends are reported under income from financial instruments in the caption “interest income from financial instruments at fair value” and “dividend income from financial instruments at fair value”.

Financial instruments valued at fair value for which changes in value and impairment losses are recorded in the statement of other comprehensive income (FVTOCI)

Investments in equity instruments are recognised in the balance sheet at fair value. Changes in value are recognised in the income statement except for those cases for which VP Bank Group has decided to recognise them at fair value and record the value changes under other comprehensive income (at fair value through other comprehensive income). Dividends are reported under income from financial instruments in the caption “dividends from financial instruments FVTOCI”.

Financial instruments designated at fair value up to December 31, 2010

VP Bank Group applies the fair-value option as foreseen by IAS 39 in respect of financial instruments designated at fair value on the basis of the internal management and performance measurement foreseen under its risk-management and investment strategy. These financial instruments are measured at fair value. Unrealised and realised gains and losses are taken to income and reported under other income/loss. The fair value is based on quoted market prices if there is an active market. If there is no active market, fair value is determined on the basis of prices set by dealers or external pricing models. By their nature, the valuations depend on the underlying

assumptions used. Interest and dividend income are recorded in net interest income. Interest is recorded on an accruals basis.

Available-for-sale financial instruments up to December 31, 2010

Available-for-sale financial assets are instruments which, in the opinion of Management, can be sold in response to or because of an anticipated liquidity need or because of expected movements in interest rates, exchange rates or equity prices. They include money-market or other debt instruments as well as equity investments and are measured at fair value. The fair value is based on quoted market prices if there is an active market. If there is no active market, fair value is determined on the basis of prices set by dealers or external pricing models which are based exclusively on data observable on markets. Unrealised gains or losses arising on available-for-sale financial instruments are recorded within shareholders' equity, less related income taxes, until such time as the financial investments are sold, are the object of legal collection proceedings or otherwise disposed of or classified as being value-impaired. Should an available-for-sale asset be disposed of, the accumulated unrealised gains or losses so far recorded as part of equity shall be reclassified to the income statement of the reporting period under other income/loss. Interest and dividend income are recorded in net interest income. Interest is recorded on an accruals basis.

As soon as an available-for-sale financial investment is classified as being value-impaired, the accumulated unrealised gains or losses so far recorded as part of shareholders' equity shall be reclassified to the income statement of the reporting period under valuation allowances, provisions and losses. For unquoted equity paper, the realisable value is determined on the basis of prices set by dealers or external pricing models which are based exclusively on data observable on markets. Valuations arrived at in this manner can be modified by Management based upon their own judgment. The realisable value of listed financial investments is determined on the basis of market prices. Financial instruments are classified as valued-impaired whenever objective indications exist pointing to the fact that the decline in market price has assumed a certain magnitude or other indices exist which point to a permanent impairment in value.

Held-to-maturity investments up to December 31, 2010

This category is not used by VP Bank Group.

Post-balance-sheet date events

There were no post balance sheet events that materially affected balance sheet and income statement for the 2011 half-year period.

The Board of Directors reviewed and approved the consolidated semi-annual report in its meeting of August 18, 2011.

The following exchange rates apply in respect of the most important Group currencies:

| | Balance sheet date rates | | | Average rates | | | Balance sheet date rates | | Variance | |
|---------|--------------------------|------------|------------|-------------------------|-------------------------|---------|--------------------------|---------------|-------------|---------------|

13 Debentures, Verwaltungs- und Privat-Bank AG, Vaduz

| Year of issue | ISIN | Interest rate in % | Currency | Maturity | Nominal amount | Total | Total |
|---------------|--------------|--------------------|----------|----------|----------------|------------|------------|
| In CHF 1,000 | | | | | | 06/30/2011 | 12/31/2010 |
| 2007 | CH0030896697 | 2.875 | CHF | 06/04/12 | 250,000 | 249,203 | 249,096 |
| 2010 | CH0112734469 | 2.5 | CHF | 05/27/16 | 200,000 | 198,102 | 197,702 |

At the time of their initial recording, debt securities are accounted for at their fair value plus transaction costs. The fair value equals the consideration received. Subsequently, they are valued for balance sheet purposes at their amortized cost, using the effective interest method (debenture 2012: 3.14 percent; debenture 2016 2.73 percent) in order to amortize the difference between issuance price and redemption value over the duration of the debt securities.

¹ Calculation in accordance with Table P of the Guidelines to the Liechtenstein Banking Ordinance issued by the Government of Liechtenstein (FL-BankO).

The recharging of costs and revenues between the business units is made on the basis of agreements as would be drawn up between unrelated third parties ("at arm's length"). Costs recharged between the business units are reviewed annually and renegotiated to reflect changed economic conditions.

As of September 1, 2010, a new organizational structure was introduced in VP Bank Group. Since this date, VP Bank Group is divided into four business units – Banking Liechtenstein & Regional Market, Private Banking International, Wealth Management Solutions & Services as well as CFO & Corporate Center. Segment reporting was applied retroactively.

Structure

The Banking Liechtenstein & Regional Market business unit encompasses the universal banking business in the Liechtenstein home market and in Switzerland as well as the international private banking, intermediaries and fund solutions businesses conducted in Liechtenstein. The units of Verwaltungs- und Privat-Bank Aktiengesellschaft that are in direct contact with clients, IFOS Internationale Fonds Service Aktiengesellschaft and VPB Finance S.A. are allocated to this business unit.

Segment income

The first half of 2011 was very challenging. The low interest-rate level and the ongoing uncertainties in markets continued during the reporting period. Interest-rate margins could be stabilized at a low level. The lower level of activities of our clients as well as the strong Swiss franc impacted the commission business in particular. The segment income improved during the first half of 2011 over that of the comparable prior-year period. The gross margin was 76.6 basis points (prior-year period: 72.2 basis points). The cost/income ratio improved from 39.4 to 39.6 percent.

Total net operating income declined by 2.4 percent from CHF 72.3 million to CHF 70.6 million as a consequence of the downturn in the income from commission business and service. Operating expenses fell by 1.8 percent to CHF 27.9 million (prior-year period: CHF 28.4 million). The decline is to be ascribed to lower recharges from other segments. In the first half of 2011, required depreciation and amortisation, valuation allowances and provisions totaled CHF 0.1 million in comparison to the CHF 4.8 million in the prior-year period. Pre-tax results increased from CHF 39.1 million to CHF 42.5 million or by 8.7 percent over the comparable prior-year period.

A good result was achieved as regards net new money inflows. During the first half of 2011, the net outflows of client money were reduced significantly. In the first half of 2011, the outflow totaled CHF 0.1 billion compared to a net outflow in the first half of 2010 of CHF 0.7 billion. As of June 30, 2011, client assets under management totaled CHF 18.0 billion (December 31, 2010: CHF 18.8 billion). The employee headcount fell from 164 (December 31, 2010) to 160 positions.

Structure

The Private Banking International business unit encompasses the private banking business in international locations. VP Bank (Schweiz) AG, VP Bank (Luxembourg) S.A., VP Vermögensverwaltung GmbH, VP Bank and Trust Company (BVI) Ltd., VP Bank (Singapore) Ltd. and VP Wealth Management (Hong Kong) Ltd. are allocated to this business unit.

Segment income

A strong Swiss franc, the uncertainties in markets and the economic outlook impacted our international private banking business. On the other hand, market-development activities continued to develop positively. The segment income improved marginally in the first half of 2011 in comparison with the prior-year period. The gross margin decreased to 93.1 basis points (prior-year period: 93.7 basis points). The cost/income ratio declined from 72.5 to 70.7 percent.

The lower level of client activities as a result of uncertainties negatively impacted commissions and service income. Thanks to a strong interest business and trading, total net operating income improved by 3.5 percent to CHF 35.3 million (prior-year period: CHF 34.1 million). Primarily as a result of the development of marketing activities operating expenses increased period-on-period by 2.5 percent from CHF 23.9 million to CHF 24.5 million. Depreciation and amortization, valuation allowances and provisions increased by 14.3 percent from CHF 2.7 million to CHF 3.1 million. Pre-tax results in the first half of 2011 totaled CHF 7.6 million, representing an increase of 2.8 percent over the comparable prior-year period.

Continuing successful market activities brought this segment an increase in new client money. In comparison with the first half of 2010, the net new money inflows doubled from CHF 0.2 billion to CHF 0.4 billion. As of June 30, 2011, client assets under management totaled CHF 7.5 billion (December 31, 2010: CHF 7.7 billion). The employee headcount increased from 202 (December 31, 2010) to 208 positions.

Structure

The CFO & Corporate Center encompasses the areas of Group Finance & Risk, Group Legal Services & Compliance, Group Human Resources Management and Group Communications & Marketing. Those revenues and expenditures having no direct connection to the operating business segments, as well as variable salary components and consolidation adjustments, are recorded in the Corporate Center.

Segment income

The weakness of the euro and the volatile financial markets negatively impacted trading income in comparison with the comparable prior-year period. Net interest income stabilized. Total net operating income declined by 18.3 percent to CHF 21.2 million (prior-year period: CHF 26.0 million). Operating expenses decreased from CHF 24.4 million to CHF 20.7 million. Depreciation and amortization, valuation allowances and provisions increased in total from CHF 0.9 million to CHF 1.9 million. Pre-tax results totaled minus CHF 1.5 million in contrast to CHF 0.7 million in the prior-year period. The employee headcount fell from 113 (December 31, 2010) to 101 positions.
